

UI Designer

Team:	Design
Reports to:	TBD
Contract Type:	Permanent, Full Time
Location:	41-45 Blackfriars Bridge Court, Blackfriars Bridge Road, London, SE1 8NZ

A little bit about us

- Our vision is to facilitate customer communication by making real life consumer experiences accessible whenever people need them
- We are passionate and protective of our brand values of trust and impartiality
- We are a dynamic SaaS company backed by top tier VCs
- Our products are used at scale with over 250+ enterprise brands using our products across 60 countries in 30 languages generating over 6B consumer impressions
- We believe in delighting our customers through a best in class user experience
- We are a diverse team made up of all kinds of brilliant and interesting people

What will you do?

You'll be joining a design team inside a wider cross functional team of Product Managers, Developers and UX Designers. You will work on a daily basis with this team to design, prototype, test and deliver new products and features. Collaborating with team members, you will:

- Play a key role in defining Reevo's Design language to ensure a unified experience across our product portfolio
- Follow user-centred design principles to build high quality visuals in a multi-platform, multi-channel world for millions of our users
- Find ways to solve complex interaction and visual design problems
- Build rapid prototypes for user testing and high-quality designs in a quick and iterative fashion
- Work closely with Product and Development to ensure features are built to a high standard, pairing with a developer as necessary
- Think and operate at both the conceptual level and at a high level of design detail
- Ensure delivery of complete features on time.
- Participate in regular brainstorming sessions, team retrospectives, product reviews, and design talks.
- Work closely with enablement teams such as Customer Success and Solution Design to ensure Reevo products are implemented correctly by our customers.

What are we looking for?

- 3-5 years of UI Design experience (You've shipped lots of product in this time!)
- A practical approach, keen eye for detail and a commitment to quality
- Experience working alongside product managers, developers and other designers in an agile environment
- Understanding of the technical capabilities and limitations of both web and mobile technologies such as different type of browsers, devices, HTML, CSS, Javascript, IOS, Android
- Excellent communication skills and the skills to effortlessly and clearly articulate the rationale for your design decisions
- Craftsmanship and creation of elegant and compelling designs, over and over
- Ability to code HTML and CSS would be useful, with Email as an added bonus
- Animation design experience would be also useful

Platform Team Culture

Here is what we value as a platform team:

Impact – we want everyone to only work on only the most important things and understand the impact their work will have in delivering value to our customers.

Disagree/commit – we aren't afraid to disagree with each other, engage in passionate debate, and advocate for our approach to try to solve a problem. But once we make a decision, everyone commits to that decision and does whatever needed to make it successful.

Act like the owner – we expect everyone to behave like they are the owner at Reevo and to do what is right for the company first and foremost. This means letting go of emotion and ego.

Have fun together – we try to make sure we have fun together whether it's having beers at the pub, or just the thrill of solving a hard problem.

Reevo is an Equal Opportunities Employer.

Please note: we can only consider applicants with the current legal right to work in the UK.
